🗺 MBBS Roadmap (Week-wise Structured Plan)

🧭 PHASE 1: First Year Foundations (Basic Medical Sciences)

📅 Weeks 1–6

📘 Week 1: Introduction to Medicine

- What is MBBS?
- Role of doctor
- Medical ethics basics

👉 Goal:

- Understand medical profession responsibility

📘 Week 2: Anatomy Basics

- Human body overview
- Medical terminology

📘 Week 3: Cell Biology

- Cell structure
- Tissues

📘 Week 4: Physiology Introduction

- Body systems overview
- Homeostasis

📓 Week 5: Biochemistry Basics

- Carbohydrates
- Proteins
- Lipids

📓 Week 6: Study Techniques

- How to memorize medicine
- Diagrams + mnemonics

🧠 PHASE 2: Core First Year Subjects

📅 Weeks 7–14

📓 Week 7: Anatomy Deep Dive

- Bones system
- Skeleton structure

📓 Week 8: Muscles System

- Types of muscles
- Movement mechanics

📓 Week 9: Nervous System Intro

- Brain structure
- Spinal cord basics

📓 Week 10: Physiology Deep Dive

- Heart function

- Blood circulation

Week 11: Respiratory System

- Lungs
- Breathing mechanism

Week 12: Digestive System

- Stomach
- Liver
- Digestion process

Week 13: Biochemistry Revision

- Enzymes
- Metabolism

Week 14: First Year Revision

Practice:

- Past papers
- Diagrams

PHASE 3: Second Year Core Subjects

Weeks 15–24

Week 15–16: Pathology Intro

- Disease basics
- Inflammation

📓 Week 17–18: Microbiology

- Bacteria
- Viruses
- Fungi

📓 Week 19–20: Pharmacology Basics

- Drugs introduction
- Drug mechanisms

📓 Week 21–22: Body Systems Diseases

- Heart diseases
- Lung diseases

📓 Week 23–24: Clinical Correlation

- Linking theory to patients

🧪 PHASE 4: Clinical Years (Real Hospital Exposure)

📅 Weeks 25–36

📓 Week 25–26: Hospital Introduction

- OPD visits
- Patient interaction basics

📓 Week 27–28: Internal Medicine

- Diagnosis basics
- Symptoms analysis

📓 Week 29–30: Surgery Basics

- Wounds
- Minor procedures

📓 Week 31–32: Pediatrics

- Child diseases
- Vaccination

📓 Week 33–34: Gynecology & Obstetrics

- Pregnancy care
- Women health

📓 Week 35–36: Clinical Skills

- Taking history
- Physical examination

🧪 PHASE 5: Advanced Clinical Training

📅 Weeks 37–44

📓 Week 37–38: Diagnosis Skills

- Lab reports reading
- Imaging basics

Week 39–40: Emergency Medicine

- First aid
- CPR basics

Week 41–42: Surgery Rotation

- Operating room exposure

Week 43–44: Specialty Exposure

- Cardiology
- Neurology basics

PHASE 6: Final Year Preparation

Weeks 45–50

Week 45–46: Revision of All Subjects

- Anatomy
- Pathology
- Pharmacology

Week 47–48: Clinical Exams Prep

- OSCE practice
- Viva preparation

📖 Week 49–50: Case Studies

👉 Practice:

- Real patient cases

🏥 PHASE 7: House Job (Internship Year)

📅 Weeks 51–52 (Start Phase)

📖 Week 51: Hospital Internship Start

- Rotations begin:
  - Medicine
  - Surgery
  - Pediatrics

📖 Week 52: Real Patient Handling

- Under supervision:
  - Diagnosis
  - Treatment assistance

⏰ Study Routine (VERY IMPORTANT)

Daily:

- 4–8 hours study (MBBS is heavy)
- Hospital exposure + theory

🎯 Final Outcome (After MBBS Completion)

You become:

- ✅ Doctor (MBBS Graduate)
- ✅ Able to diagnose patients
- ✅ Work in hospitals
- ✅ Prepare for specialization (FCPS / USMLE)

🧠 Specialization Options (After MBBS)

- Medicine
- Surgery
- Cardiology
- Neurology
- Dermatology
